Overview

- Provide guidance to cancer registrars on key topics
 - AJCC T category options for registry data items in 2016
 - AJCC N category options for registry data items in 2016
 - AJCC M category options for registry data items in 2016
 - Information and questions on AJCC staging

2 Copyright © 2015 AJCC. All Rights Reserved

Learning Objectives

- Recognize new category options based on AJCC rules
- Demonstrate correct usage of new category options
- Employ critical thinking to assigning AJCC stage
- Identify resources for AJCC staging

AJCC T, N, and M Category Options for Registry Data Items in 2016

Registry Data Items –
T, N, and M Category Options

Completing Registry Data Items

- Registry data items seen on software screen
 - CLINICAL T N M Stage Group
 - PATHOLOGIC T N M Stage Group
- Use appropriate T, N, and M categories
 - Based on what is needed to assign stage correctly
 - Follows AJCC staging rules
- Categories will be grouped in the appropriate line
- Match stage assigned by physician
 - According to AJCC rules

Registry Data Items - Examples

- Patient had bowel obstruction and went directly to surgery where colon cancer was found
- Physician assigned pathologic stage
 - pT4a pN2a cM0 Stage IIIC
- cT blank cN blank cM blank Stage group blank or 99
- pT4a pN2a cM0 Stage group 3C
- Cannot assign clinical stage, cancer not known prior to definitive treatment
 - AJCC is stage group blank, but CoC requires non-blank value for clinical stage
- Appropriate M category assigned for pathologic stage

AJCC T, N, and M Category Options for Registry Data Items in 2016

Registry Data Items - Examples

- Clinical stage of in situ cancer of breast, with total mastectomy and no nodal resection
 - pTis cN0 cM0 Stage group 0
 - pTis cN0 cM0 Stage group 0
- Can assign clinical and pathologic stage
 - Rules state in situ assigned pTis cN0 cM0 for clinical and pathologic
 - pTis serves as reminder in situ dx **cannot** be made on imaging alone
 - pTis for clinical staging has been the rule since the AJCC 5th edition
 - Rules state both clinical and pathologic stage 0
 - Rule put in place because nodes not usually resected for in situ ca
 - Can use cN0 for N category in pathologic stage
 - Meets breast criteria for pathologic classification

Registry Data Items - Examples

- Clinical stage of in situ cancer of bladder with TURB and no cystectomy
 - pTis cN0 cM0 Stage group 0
 - pT blank pN blank pM blank Stage group blank or 99
- Cannot assign pathologic stage
 - Bladder criteria of cystectomy has not been met
 - Common to not find invasive tumor on TURB
- Rules state in situ assigned pTis cN0 cM0
 - pTis serves as reminder in situ dx **cannot** be from imaging alone
 - pTis for clinical staging has been the rule since the AJCC 5th edition

AJCC T, N, and M Category Options for Registry Data Items in 2016

Registry Data Items - Examples

- Diagnostic workup includes biopsy of bone showing mets from breast ca, nodal involvement on imaging. There was no breast resection.
- cT1 cN1 pM1 Stage Group 4
- pT blank pN blank pM1 Stage Group 4
- pM1 for clinical stage, biopsy was during workup
- pM1 is both clinical and pathologic stage IV according to AJCC rules
 - Case with pM1 may be grouped as clinical and pathologic stage IV regardless of c or p status of T and N
- pT and pN are blank since all cT / cN options not available
 - Will be adjusted in 2017 for 8th edition
